The exhibition "Transcendence: A Fusion of Art and Culture" impressively demonstrated how art and culture can transcend borders. It allowed the public to connect more deeply with different European cultures and artworks, thus helping to promote cultural exchange. With the support of governments at all levels, the Pashmin Art Consortia and various artists, the exhibition has made a significant impact on the entire southwestern region and has received high recognition from artists, cultural institutions and social groups across the country. It is expected to grow into a leading contemporary art exhibition brand of national significance.

We would like to thank all the artists for transporting our corporate philosophy to China with their art.

ART REACHES. ART CHANGES. ART CONNECTS.

Sincerely

Nour Nouri
